

VARPE

CORPORATE PRESENTATION

TECHNOLOGICAL SOLUTIONS

TAILOR-MADE GLOBAL SOLUTIONS

Tailor-made global solutions to meet the **specific needs** of our customers with **custom-built** equipment.

Always by your side.

Founded in 1983, the Varpe Group is a leading manufacturer of global technological solutions in X-ray inspection, **check weighing** and metal detection for its production processes.

We provide our customers with the added value of flexibility and customization they need, thus achieving the perfect balance between functionality and design.

Varpe offers services throughout the entire process, from commercial advice to the end of the product life cycle, without forgetting the design, manufacturing, programming of custom software, commissioning of the equipment, user training, certifications and legal scenarios of each territory (ENAC, MID, etc.), maintenance and spare parts services and after-sales service.

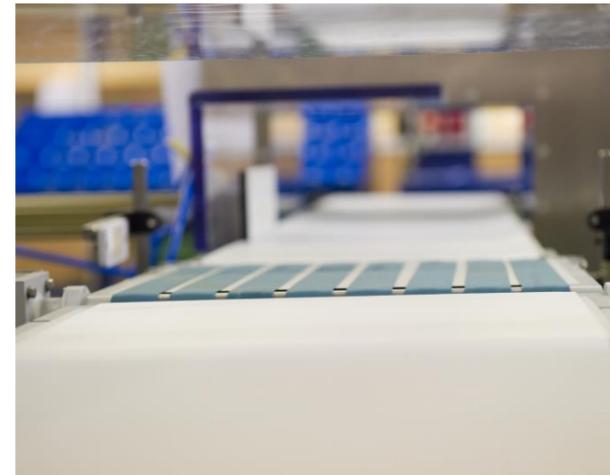

WEIGHT MANAGEMENT

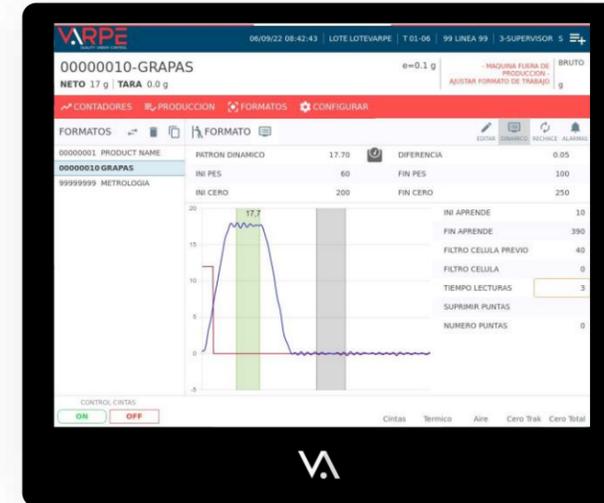

NO STOPS

They control the weight of products without stopping the production chain.

WEIGHT MANAGEMENT

Automatically control the weight of 100% of products

USER-FRIENDLY SOFTWARE

It includes user-friendly and easy-to-use software.

AUTOMATIC SEPARATION

Automatically separates products that do not comply with tolerance limits.

IN ADDITION...

HELPS COMPLY WITH REGULATIONS

Varpe equipment is thought to help with compliance with regulations that apply to manufacturers, such as 21 CFR and food safety standards (BRC, IFS, GAP, SQF, ISO, FSCC...)

EFFECTIVE CONTENT CONTROL AND METROLOGY

Control of the effective content of packaged products. You have the option to work under the EEC regulations, where the concepts of tolerance and quantity of accepted containers are automatically considered. It has metrological confirmation according to the European Metrology Directive.

FOREIGN BODY DETECTION

Exclusive **X-ray developments** for packaged, canned, and glass products, as well as bulk applications.

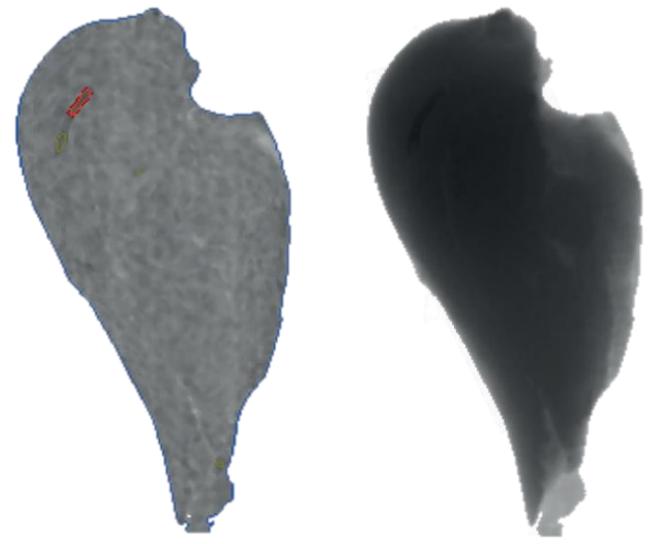

DETECTION IN ALL TYPE OF PRODUCTS

Detection of foreign bodies in frozen, liquid, packaged or unpackaged and bulk products.

FOREIGN BODIES OF LOW DENSITY

Detection of low-density foreign bodies thanks to the technology provided by an HD camera.

DETECTION WITH DUAL ENERGY

Detection of foreign bodies with double energy for cases where the product has complex textures or shapes.

X-RAY INSPECTION & METAL DETECTION

X-ray inspection equipment and metal detectors adapted to the needs of each industry.

SIMULTANEOUS VERIFICATION

They simultaneously check damaged products, breakage, mass measurement with estimated weight, and counting of elements within the product.

INTERNATIONAL SECURITY

All VARPE X-ray inspection equipment complies with safety standards that govern ionizing radiation emissions.

DATA MANUFACTURING SOFTWARE **VIT4** **VARPE**

SMART INDUSTRY

QUALITY UNDER CONTROL

“**Thought** and **designed** to grow with your needs.

CONSOLIDATED PRODUCTION DATA

It **stores the data** and displays it orderly, allowing for further analysis through reporting.

FUTURE FORECASTS

The system gives **warnings about future developments**, such as Upcoming Maintenance for a better organization of production.

4.0 INDUSTRY

VIT4 and **manages the data** generated by Varpe equipment during production.

REAL-TIME DATA

It displays **real-time information** on the status of connected machines and ongoing production.

TECHNICAL ASSISTANCE

TECHNICAL ASSISTANCE

Technical assistance service with more than 15 technicians.

MAINTENANCE PLANS

Maintenance plans designed to cover all the maintenance needs of the different equipment.

REMOTE SUPPORT

Equipment can be accessed via real-time remote connection thanks to Varpe Monitor.

SPARE PARTS

Management and shipment of original spare parts for your equipment.

CALIBRATIONS AND SENSITIVITY TESTS

CALIBRATIONS

Calibration of ENAC certified dynamic checkweighers.

SENSITIVITY TESTS

Sensitivity tests for X-ray inspection equipment and metal detectors, ENAC certified.

RADIATION LEVELS AND SAFETY CERTIFICATE

Testing of Levels of Radiation & Safety.
